February 3**

6:30 p.m.

**Logan Medical Center
Conference Room**

RSVP - 260-4170

**Refreshments
will be provided**

You are cordially invited to attend a community education event sponsored by Logan Medical Center.

Depression is a medical condition that affects 19 million Americans each year. Experts estimate that 15 out of every 100 adults will experience a depressive episode at some point during their elderly years. But, depression is not a normal part of aging and it should not go overlooked or untreated.

This educational seminar is for anyone who would like to learn more about the symptoms and treatment of depression. Learn to recognize depression in family members, friends or co-workers.

What is Depression?
What are the different types of depression?
What are the signs and symptoms of depression?
What causes depression?

Dr. Darbe will answer these and more questions.

Upon graduation from Raiyaraya Medical School in India in 1976, Shantharam Darbe, M.D. opened a family practice in India and Africa and was there for eight years.

In 1986, Dr. Darbe began his psychiatry training at OU Health Sciences Center and also worked at the VA Hospital and Department of Corrections.

In 1992, he began private practice in Oklahoma City.

Since 1995, he has been the attending psychiatrist at Autumn Life Center and in January 1999 became the Medical Director. He is also the Managing Director of Mission Hospice.

Dr. Darbe sees patients at the LMC Specialty Clinic.
